

Waterco's EnviroPro range: pool equipment that not only maximises your time in the pool, but also delivers energy efficiency and water savings

Save time, water and energy

Selecting the latest environmentally friendly, easy to use pool equipment can be a daunting task That's why Waterco has introduced the EnviroPro range – to make it easier for pool owners to save precious water and energy and also reduce pool maintenance

An holistic solution, the EnviroPro range consists of a select number of Waterco's high quality, energy efficient and award-winning water saving products, from the latest energy efficient pool pump, centrifugal pre-filters and water saving cartridge and media filters, to the most up to date LED lights, solar pool heaters, heat pumps and robotic pool cleaners.

Whilst highly efficient in their own right, these products combined and operated in the correct way enable pool owners to reach the highest levels of sustainability.

Waterco's unique pre-filter **MultiCyclone** technology not only allows you to save thousands of litres of water per year, it also takes less maintenance time to clean your filter and extends the life of your equipment.

The MultiCyclone works on the basis of centrifugal water filtration. There are no moving parts to wear and tear, and no filter media to clean or replace.

Or for the ultimate convenience and maximum water savings, the **MultiCyclone Plus** is an easy to use, highly efficient centrifugal filter and cartridge filter all in one.

As MultiCyclone Plus's centrifugal section filter pre-filters up to 80% of the incoming dirt load, the capacity of its filter cartridge is magnified by up to 5 times.

Equipped with an energy saving 3 speed motor, **Hydrostorm ECO** pump uses up to 70% less electricity than a regular pump. Its quiet operation allows you to switch to off peak electricity tariffs at night, saving you even more on your energy bills. Pool water clarity is also improved, due to slow flow and better filtration.

The **Opal XL** cartridge filter eliminates the need for regular backwashing saving you both water and energy. Its oversized cartridges have been pleated to provide up to 25.1m² of surface area maximising its dirt holding capacity and minimising filter maintenance.

The **Micron ECO** allows you to enjoy the convenience of backwashing your pool, whilst using 30 per cent less water than a standard media filter. Its hydraulic efficiency facilitates the use of a lower powered pump, leading to significant energy savings.

Admiral, Waterco's new range of next generation energy efficient robotic pool cleaners, ensures your pool will be sparkling and effortlessly clean in less than two hours, using only 80 watts of power – which is less power than required to illuminate one halogen pool light.

The **Zane Solar Systems** and the **Electroheat heat pump** not only enable you to save on your energy bills, you can also extend your swim season or even swim all year round – conveniently and cost effectively.

Zane Solar absorbs the sun's heat via a series of solar absorbers strategically installed on your roof and transfers it to your swimming pool. After the initial setup cost, the ongoing running costs are minimal as the heat is provided free from the sun.

Electroheat is the latest advancement in swimming pool heating: the heat pump extracts latent heat from the surrounding air, intensifies it and transfers it to your swimming pool. Electroheat heat pumps extend your swimming season without burning a hole in your pocket.

The **BriteStream Multicoloured LED** lights not only look great, but they operate on a mere 15% of the electrical power required for the halogen equivalents. The light produces a multitude of different colours at a flick of a switch.

Established in 1981 and listed on the Australian Stock Exchange in 1989, Waterco (ASX: WAT) manufactures and distributes a diverse range of products for the international swimming pool, spa and water treatment markets.

Waterco delivers high quality water treatment pumps and filtration systems, solar pool heating, chemicals and swimming pool and spa accessories at exceptional value to over 40 countries worldwide.

Waterco's head office is located in Sydney, Australia with international offices, manufacturing plants and warehouses located in Australia, New Zealand, Malaysia, Indonesia, Singapore, China, US, Canada and the UK.
